Career Objective

Detail-oriented Full-Stack Developer with hands-on experience building scalable web applications. Proficient in JavaScript (ES6+), modern frontend frameworks, and robust backend architectures. Equipped with strong fundamentals in databases (SQL/NoSQL) and RESTful API design. Experienced in implementing secure authentication, version control (Git), and agile methodologies. Adept at writing clean, maintainable code and troubleshooting complex performance bottlenecks. Seeking to leverage technical skills and problem-solving abilities to deliver high-quality software solutions in a fast-paced development team.

Education

Bachelor of Science in Computer Science

Aug 2022 - May 2025

Bharath Institute of Higher Education and Research

Chennai

CGPA: 8.35

Projects

Group Music Listener (MERN + Socket.io)

- **Engineered a real-time synchronized music platform** leveraging Socket.io and the MERN stack, enabling low-latency playback controls and state synchronization across multiple users in room-based sessions.
- **Architected localized state management** using the React Context API to eliminate prop-drilling, ensuring efficient, real-time UI updates for dynamic collaborative playlists.
- **Implemented a secure OTP authentication system** integrated with Node.js and Express backend services to manage user verification, session creation, and secure room access.
- **Designed scalable WebSocket event handlers** to manage room connections, disconnections, and concurrent message payloads without blocking the main event loop.

Expense Tracker (MERN Stack)

- **Developed a secure full-stack expense tracking application** utilizing the MERN stack (MongoDB, Express.js, React.js, Node.js) to deliver high-performance financial data management and smooth user experiences.
- **Implemented robust authentication and security protocols** using JSON Web Tokens (JWT) for stateless session management, bcrypt for password hashing, and cookie-parser to enforce secure HTTP-only token storage.
- **Engineered scalable RESTful APIs** with Node.js and Express, configuring strict CORS policies to protect cross-origin requests and integrating Nodemailer to automate system-generated email alerts.
- **Optimized database schemas and frontend delivery** within MongoDB to ensure efficient CRUD operations for real-time tracking while leveraging modular React components to minimize bundle size.

Skills

Technical Languages : JavaScript, HTML, CSS

Frontend Technologies : React.js, Redux, Bootstrap, Tailwind, Responsive Design, State Management

Backend Technologies : Node.js, Express.js, MongoDB, SQL

Tools & Other Technologies Skills : Git, GitHub, RESTful APIs, Vercel, Render, Authentication

Soft Skills

- Teamworking
- Quick Learner
- Problem Solving
- Critical Thinking

Declaration

I hereby declare that the above-mention is true, accurate and complete to the best of my knowledge and belief and I take full responsibility for the authenticity of the details provided.
